

TELEMARK CERTIFICATION STANDARDS

Effective June, 2006

- *Registered*
- *Level I*
- *Level II*
- *Level III*

The following are the current (2005) PSIA Education/Certification Standards for Telemark (aka Nordic Downhill Skiing). Referenced to PSIA-AASI's *Core Concepts* (2001), PSIA's *Alpine Technical Manual* (2002), and PSIA's *Nordic Technical Manual* (2005), terminology consistent with these manuals is used throughout this document. These standards provide a training focus, and represent a minimum competency for each level of certification.

The premise of the certification standards is based upon the concepts of "levels of understanding" which define stages of learning in degrees of understanding. As certification is a measure of understanding, levels of certification represent stages of understanding. Candidates will be held to the knowledge and performance standards of the level at which they are testing as well as the criteria for all preceding levels.

REGISTERED (Educational outline for use by home school or for divisional training)

Registered instructor is PSIA's entry level of membership, designed to provide an educational introduction to ski teaching. The Registered level event is conducted according to divisional criteria, and is not a level of certification recognized nationally by PSIA. Therefore, the criteria for Registered level instructors within the National Standards serves only as a guideline for establishing divisional education criteria which prepares Registered level instructors to meet future levels of certification according to the nationally recognized standards for Levels I, II, and III.

Category A: PSIA-AASI Education

General PSIA-AASI education provides teachers with an overview of snowsports instruction, a brief history of PSIA-AASI, and an introduction to the professional aspect of teaching snowsports. Registered members will be expected to recall and comprehend basic information about the aspects of ski teaching and the ski industry listed below.

The instructor will be able to ...

1. Introduction to PSIA-AASI

- a. Recall the history, purpose, and organization of PSIA-AASI
- b. Identify the vision/mission statement of PSIA-AASI

2. Ski Industry

- a. Discuss the role of ski instruction within the snowsports industry
- b. Describe the organization of one's home resort
- c. Discuss the teamwork aspect of home resort area operations

3. Professionalism

- a. Discuss the basic principles and philosophies of professionalism
- b. Discuss specific behaviors of ski instructor professionalism and demonstrate professionalism at home resort

Category B: Skiing

Registered level teachers must demonstrate the ability to ski safely terrain common to the Beginner/Novice zone, and to demonstrate consistently the fundamental elements of stance and balance in a form that will create understanding and encourage further development. No specific parameters are set for the performance of any maneuvers until Level I certification. (*The term "balance" in the following descriptions references appropriate flex in the joints to keep hips over feet; proper hand and arm position; forward vision; appropriate stance width; and basic movements that facilitate fore-aft and lateral balance.*)

The instructor will be able to demonstrate the following in either Telemark or Alpine technique

1. A balanced athletic stance
2. Balance in a straight run
3. Balance in a traverse

4. Balance in a sideslip
5. Ski wedge turns
6. Slow, open turns representative of new skiers on accelerated learning equipment

Category C: Core Concept Education

Core concept education for Registered teachers explores the personal motivation for teaching, and promotes a teaching style/learning environment guided by emotional involvement. Registered level teachers must demonstrate understanding of risk management and safe class handling with Beginner/Novice zone students. Registered instructors have an awareness of basic physical, mental, and social characteristics of students, especially as related to teaching children.

The instructor can...

1. Core ideals

- a. Describe personal motivation for becoming a snowsports teacher
- b. Describe personal strengths and weaknesses relative to the communication and people skills required to effectively teach snowsports

2. Understanding students

- a. Demonstrate an awareness of physical, cognitive, and affective development in a variety of student populations
- b. Demonstrate an awareness of physical, cognitive, and affective development in children

3. Class Handling and Organization

- a. Recognize the impact and importance of developing trust in the learning environment
- b. Manage risks present in the mountain environment in a responsible manner
- c. Demonstrate an ability to provide individual attention to students in a class
- d. Provide a Beginner/Novice zone lesson format based on the guidelines of the American Teaching System (ATS) and one's home resort

4. Risk Management

- a. Recite *Your Responsibility Code* and teach it to students at one's home resort
- b. Practice class handling that demonstrates appropriate decision-making based upon risk management principles

5. Customer Service

- a. Identify key elements of a student-centered and experience-oriented approach to teaching
- b. Relate various customer services at one's home resort to ski school students
- c. Demonstrate customer-oriented behaviors that create relationships with guests and students

Category D: Nordic Technical Education

The level of proficiency required of Registered level teachers is defined by a general awareness of basic technical issues, and an ability to demonstrate typical movements and tasks of Beginner/Novice zone skiing.

The instructor can...

1. Skills Concept

- a. Identify and define the four categories of skills

2. Phases of the turn

- a. Identify the three phases of a turn
- b. Identify dominant movements and skill areas during a turn typical of a student in the Beginner/Novice zone

3. Equipment

- a. Characterize the type of rental equipment most often seen at the home resort
- b. Describe proper fit of boots, ways to check the fit of students' boots, and methods of adjustment in fit
- c. Describe proper ski lengths for Beginner/Novice zone students
- d. List required clothing and safety items

4. Movement Analysis

- a. Recognize basic aspects of proper stance and sliding balance
- b. List activities which highlight specific movements relative to chosen categories of the skills concept

5. Stepping Stones

- a. Identify the basic principle of the *stepping stones*, as described in the *Nordic Technical Manual* (PSIA, 2005)
- b. Describe the teaching progression favored at one's home resort for teaching first-time skiers

Telemark Certification Professional Knowledge Standards 2006

● Level I –Beginner Zone

The candidate is able to...

■ Level II – Intermediate Zone

and the candidate is able to...

◆ Level III –Advanced Zone

and the candidate is able to...

Movement Analysis

- Recognize general movement patterns relative to skill categories in beginner/novice zone skiers
- Identify desired skill and movement outcomes in various types of beginner/novice zone skiing including beginner telemark, parallel and wedge turn progressions
- List exercises and tasks that address a student’s needs, the equipment being used, terrain options, etc.

- Describe the forces acting on a skier in a turn; relate how a skier uses muscular effort and movements to manage these forces
- Understand the *visual cues of effective telemark skiing* relative to Intermediate zone applications
- Understand cause-and-effect relationships between movements and resultant ski performance in intermediate zone skiing situations
- Consider non-performance factors such as age, past experience, conditioning etc., when analyzing the ability of students
- Communicate movement analysis information to students in simple, positive language

- ◆ Incorporate all aspects of student-teacher communication as a part of movement analysis, utilizing personality traits such as motivation and emotion in addition to actual skiing performance
- ◆ Understand the *visual cues of effective telemark skiing* relative to Advanced zone skiing applications
- ◆ Understand cause-and-effect relationships and resultant ski performance in advanced zone skiing situations
- ◆ Utilize informal movement analysis (in addition to formal situations) to constantly monitor all aspect of movement and movement patterns as an ongoing process throughout a lesson
- ◆ Evaluate the effectiveness and performance of practice activities, and continuously adjust lesson plans accordingly

Personal Mastery

- Identify and develop a vision for personal growth as a snowsports teacher
- Understand the pathways for personal and professional growth by identifying the resources available both inside and outside of PSIA-AASI
- Plan short- and long-range schedules for training and certification goals

- Include resort-wide interests in all lesson situations, addressing student needs beyond learning to ski
- Demonstrate an ability to handle internal and external conflict resolution
- Demonstrate an ability to interact in resort areas outside of the lesson environment

- ◆ Seek outside education options to promote a broad understanding of the sport
- ◆ Seek involvement in helping less experienced teachers

LEVEL I

Level I members demonstrate a solid foundation of information and experience necessary to be an effective ski teacher. The Level I instructor possesses an understanding of *basic* skiing skills, teaching skills, and professional knowledge. It is not expected that Level I candidates will have *in-depth* knowledge and experience in each of the areas of competence listed in these Standards. It is expected, however, that candidates will be able to show *basic* competence and knowledge in all of these areas. In addition, it is expected that candidates will be able to demonstrate a *significant* level of competency with the skiing and teaching tasks listed specifically for assessment at a Level I event.

Category A: Skiing

Level I teachers must be able to ski all green and groomed blue terrain demonstrating consistent balance and control of speed through turn shape. Demonstrations must display an “understandable picture” of the technical elements of beginner/novice zone skiing. The turn dynamics are limited by the speeds and terrain appropriate for Beginner/Novice zone skiing and tasks.

The instructor is able to...

1. General Characteristics

- a. Maintain a balanced stance throughout a series of turns
- b. Maintain consistent speed by controlling the shape of a turn
- c. Reduce speed without interrupting overall flow and rhythm
- d. Consistently link turns with sustained rhythm
 - Combine the movement of the body and poles
 - Adequately direct the Com in the direction of travel
 - Use poles
- e. Demonstrate an appropriate blend of skills (with consideration for the snow conditions, equipment, terrain, etc.)
- f. Ski a variety of turn sizes within a series of turns while maintaining speed control
- g. Demonstrate the *visual cues to effective telemark skiing** relative to edging, rotary and pressure control movements in demonstrations and tasks common to Beginner/Novice zone skiers

**Visual Cues Effective Telemark Skiing*, from the *Nordic Technical Manual* do not address alpine stances. For these please refer to the *Visual Cues to Effective and Ineffective Skiing* in the *Alpine Technical Manual*, (PSIA, 2002).

2. Matrix for Telemark Certification Standards, p. 3.

Describes specific skills at Level I

Category B: Teaching

Level I teachers demonstrate a solid foundation of information, and experience necessary to be an effective teacher of beginner/novice zone skiers. A basic understanding of how to manage the learning environment for different age and gender situations is required.

Please see the **Matrix for Telemark Certification Teaching Standards, p. 4-5.**

Describes specific skills at Level I

Category C: Professional Knowledge

Professional knowledge requirements for Level I teachers reflect a practical awareness of general terms and concepts, and an ability to use these concepts in basic lesson situations for beginner/novice zone students. Decision-making and lesson content will most likely follow preplanned options, with consideration for different skill development emphasis.

Please see the **Matrix for Telemark Certification Professional Knowledge Standards, p. 6-7.**

Describes specific skills at Level I

LEVEL II

The Level II member is one who has demonstrated commitment and dedication to the ski teaching profession and to his/her own personal development. Level II members are considered qualified to provide valuable instruction to a majority of ski school guests. A Level II instructor demonstrates the ability to relate movements and skill areas to movement outcomes and to apply that knowledge to teaching situations common to intermediate zone skiers. Level II instructors have a global understanding of the ski industry and are able to classify their responsibilities as a part of the resort team.

Category A: Skiing

Level II teachers have the skills to make short, medium, and long radius turns on blue and groomed black terrain with minimal skidding. Skis make two separate, relatively defined arcs in the snow from before the fall line to completion. Skill application and accuracy may vary with terrain and snow conditions. Demonstrations should illustrate accurate movement patterns and reflect turn dynamics relative to the speeds and forces common to intermediate zone skiers.

The instructor is able to:

1. General Characteristics

- a. Maintain a balanced stance throughout a series of turns
- b. Use ski design and skill blending to shape telemark and parallel turns
- c. Link turns of consistent rhythm and size, such as a series of short or long turns
 - Blend the movements of the body and poles moving from turn to turn
 - Ability to move the COM across the skis actively
 - Use pole movement to aid the flow and rhythm of the turn
- d. Reduce and maintain speed by adjusting turn shape without interrupting overall flow and rhythm
- e. Demonstrate a variety of turns
- f. Apply appropriate tactics and vary skill applications in a variety of conditions, including ungroomed snow or powder
- g. Demonstrate different types of skill blends in exercises, tasks, and turns, upon request
- h. Demonstrate the *visual cues to effective telemark skiing** relative to edging, rotary and pressure control movements in demonstrations and tasks common to Intermediate zone skiers

**Visual Cues Effective Telemark Skiing*, from the *Nordic Technical Manual* do not address alpine stances. For these please refer to the *Visual Cues to Effective and Ineffective Skiing* in the *Alpine Technical Manual*, (PSIA, 2002).

2. Matrix for Telemark Certification Skiing Standards, p. 3.

Describes specific skills at Level II

Category B: Teaching

Level II teachers demonstrate an understanding of basic learning theory, communication and people skills, and human development. Practical knowledge of these concepts is required for students and teaching situations through Intermediate zone lessons. Level II teachers demonstrate the ability to adapt the lesson environment to meet a variety of options for specific audiences (i.e., age, gender).

Please see the **Matrix for Telemark Certification Teaching Standards, p. 4-5.**

Describes specific skills at Level II

Category C: Professional Knowledge

Professional Knowledge for Level II teachers reflects a basic understanding of general terms and concepts applicable through the Intermediate zone. Application of teaching concepts in actual lesson situations should reveal an ability to interpret correctly student behavior and performance, and to deliver technical content through relevant activities and simple language.

Please see the **Matrix for Telemark Certification Professional Knowledge Standards, p. 6-7.**

Describes specific skills at Level II

LEVEL III

The Level III member is one whose high levels of skill and knowledge allow him or her to make an uncompromised contribution to the customer, the Association, and the ski industry. A Level III member has the ability to assess all variables with regard to student personality traits, goals, abilities, needs, the learning environment, conditions of the day, available terrain, equipment, etc. and to synthesize these parts into a viable lesson plan. A Level III instructor can make adjustments to lesson goals and is able to appropriately adjust or modify lesson content as required by any situation.

Category A: Skiing

Level III teachers should have the skills to make short, medium, and long radius turns with little or no skidding. The skis describe two well-defined arcs from before the fall line to turn completion. Terrain and snow conditions should have a minimal effect on skill application, movement accuracy, and turn outcome. Turn dynamics should represent the terrain, speed, and snow conditions common to advanced zone skiing. A Level III teacher has the ability to maintain dynamics and movement accuracy through most conditions, on any terrain on most mountains.

The instructor is able to...

1. General Characteristics

- a. Ski dynamic-telemark and parallel turns on any terrain on most mountains
- b. Reduce, maintain and generate speed without interrupting overall flow and rhythm
 - Consciously affect the movements of the body with pole movements to complement turn outcome
 - Actively and accurately move the center of mass from turn to turn with little interruption of rhythm and flow
 - Applies appropriate poling movements to specific turn shapes/tactics
- c. Ski a variety of turn sizes and shapes and apply them to different mountain situations
- d. Demonstrate different types of skill blends and movement patterns in exercises, tasks, and turns upon request, and as applied in different mountain situations
- e. Maintain control over turn shape and speed while skiing most conditions on any terrain on most mountains
Demonstrate the *visual cues to effective telemark skiing** relative to edging, rotary and pressure control movements in demonstrations and tasks common to Advanced zone skiers

**Visual Cues Effective Telemark Skiing*, from the *Nordic Technical Manual* do not address alpine stances. For these please refer to the *Visual Cues to Effective and Ineffective Skiing* in the *Alpine Technical Manual*, (PSIA, 2002).

2. Matrix for Telemark Skiing Standards, p. 3.

Describes specific skills at Level III

Category B: Teaching

Level III teachers must demonstrate an in depth understanding of basic learning theory, communication and people skills, and human development issues. Display a mastery of human development issues for all skiing populations (i.e., age, gender). Application of these concepts must produce a clear and concise delivery of information, and an uncomplicated learning environment through advanced zone lessons.

Please see the **Matrix for Telemark Certification Teaching Standards, p. 4-5.**

Describes specific skills at Level III

Category C: Professional Knowledge

Professional Knowledge for Level III teachers reflects a strong accurate understanding of skiing terminology and concepts beyond the scope of ski teaching manuals. Related industry sources, ski coaching, and familiarity with various peripheral resources promote well-rounded teaching with the capacity to create exceptional experiences for most students, in most conditions on any terrain at most mountains.

Please see the **Matrix for Telemark Certification Professional Knowledge Standards, p. 6-7.**

Describes specific skills at Level III
